q3a Company A/B

Assume your community has a parcel of land available for a new business. Two very similar computer design companies have asked to move their business to this land. Both companies have patented processes and guaranteed long-term contracts, but do not expect to grow. Both companies pay their employees about the same. Company A would come now with 10 employees. The other, Company B, would come in five years with 16 employees. The land cannot accommodate both companies, so your community must choose between 10 new employees now or 16 new employees in five years. Neither you nor anyone in your family would work for either company.

If you had your choice of alternatives, which would you choose . .

q4a Bond \$125,000/\$200,000

Next, assume an anonymous donor has made a gift to the park board in your community. The entire donation must be used to improve the facilities and landscaping in an existing community park. The gift is a secured bond that will mature in five years. The bond can be sold now for \$125,000 or the park board can wait five years until the bond is fully mature, at which time it will be worth \$200,000.

The Park Board must therefore choose between \$125,000 now, or \$200,000 in five years.

Which option would you prefer (\$125,000 now or \$200,000 in five years)?

CL1 Civil Liberties Trade Off

Next I am going to read two statements. Please tell me which one you agree with most.

The first is, in order to curb terrorism in this country, it will be necessary to give up some civil liberties. -or-

We should preserve our freedoms above all, even if there remains some risk of terrorism.

(Which statement do you agree with most?)
